Zodiac sun signs are grouped into four essential elements that when combined, create the world and allow life to flourish. Each of the 12 astrology signs falls under a specific element and the 4 elements help in understanding everybody's place in the world. The zodiac sign elements are Air, Water, Earth and Fire.

Zodiac elements are extremely symbolic with the astrology sign that they represent and will help you gain a greater understanding of people's zodiac signs and what they do in life. The astrology elements are just as important to the characteristics and personality traits of a person as their zodiac sun sign.
